Appendix A – location of proposed danger area near Denniston	3

1. Overview

Bathurst Resources Ltd, trading as Buller Coal Ltd, has submitted an application for the designation of a new danger area near Denniston.

The danger area is to alert pilots to the use of explosives for mining operations.

2. Proposed danger area

The location of the proposed danger area is shown in the diagram in Annex A.

The danger area vertical dimensions are from the surface to 5000 ft above mean sea level and it would be permanently active, 24 hours per day.

3. Likely effect on airspace users

The proposed danger area may have an impact on VFR aircraft with track deviation required to avoid the area if overflight is not possible.

There may be a small effect on the descent profile of IFR aircraft conducting the Westport RNAV (GNSS) ASKEM ONE ALFA and ESDAK ONE BRAVO arrivals.
